CROSSIT HARNESS

The **Crossit Harness System** is a postural and support harness that provides upper body support and prevents the person falling forward or to the side to ensure that the vehicle's seatbelt works correctly.

What is the function of **Crossit Harness**?

This product is used to ensure the occupant is safely seated in the correct seating position for the vehicle's seatbelt.

The **Crossit Kit** has separate straps that allow the harness to be fixed to the seatback for easy installation.

FEATURES

-  Universal postural belt system that can be used in any seat, provided there is an opening between the seat and the backrest.
-  Quick and easy to install and transfer between vehicles
-  Can be fastened vertical and connected to the chest buckle to

SPECIFICATIONS

-  Universal - one size fits all
- Can be used with wheelchairs with a stable backrest
-  This Harness System **DOES NOT** replace the vehicle safety belt

The **Crossit Harness** is a positioning belt designed with the help of many involved parents of children with disabilities, drivers in the community transport, Occupational Therapists and health professionals to ensure the correct postural supports are achieved.

Our harnesses are quick to install and can be easily transferred from across vehicles.

BENEFITS

-  Ensures the occupants safety while travelling in the vehicle
-  No modifications to your vehicle
-  Provides you with transport independence

OPTIONAL ACCESSORIES

CHEST BUCKLE - An additional option when the chest straps are installed without being crossed

BOOSTER SEAT PAD - Has an anti-slide surface and belts for supporting the thighs. This has extra straps for fastening over the lap

REQUIREMENTS It is a requirement to keep a **current** Doctor's Certificate in your vehicle when this Harness is in use in the vehicle.
